

July 12, 2007

Pasco is so pleased to be a dealer of CounterCraft custom counters. Our experience with CounterCraft is that they manufacture a product that is innovative, unique and functional. Most importantly, CounterCraft works with the end user and dealer to make modifications and recommendations so the finished product is to the customer's satisfaction. Their ability to complete a turn-key job, including installation, makes them unique in our industry.

It is certainly a pleasure to work with CounterCraft and their professional staff. It is always exciting to see the completed project and we take pride in the workmanship and follow-thru of every CounterCraft installation. Whether the application is in school foodservice, healthcare, or business and industry, we know CounterCraft will stand behind their work, and their designs will attract other food service personnel to pursue CounterCraft concepts for their applications. The food service industry today has turned the corner and no longer is accepting of an industrial look in their servery areas. CounterCraft's ability to add custom design features while still incorporating the needed elements of both hot and cold applications gives the end users opportunities to create attractive designs coupled with functional features.

The employees and installers are knowledgeable, friendly, accommodating and willing to do whatever is necessary to ensure a beautiful and usable product.

We look forward to a long productive relationship with CounterCraft. In Pasco's 46 years of operation, it is with pleasure we recommend CounterCraft, Inc.
